Escape the Geese – Implementation

Cohort 2 Team 3 – ‘Kostas Barmpis and Dimitris Kolovos’

Team members:

Sruthiksha Ananth

Louis Price

Sarah James

Ben Smejko

Henrik Bowden

Tim Giles

June Njiru

Implementation

Third-party assets, licensing and generative AI

OpenAI's image-generation tool, accessed through Codex, was used to generate the player and goose sprite sheets and the campus background from text descriptions. OpenAI's Europe Terms of Use assign users any rights OpenAI holds in the output, to the extent permitted by law, providing a basis for using the assets in our game while respecting third-party rights [1]. The prompts used generic descriptions without reference images, named characters, brands or artists. The generated images were visually checked for logos, watermarks and recognisable third-party characters; none were identified. These checks reduce infringement risk but do not establish originality or guarantee that no third-party rights are involved.
